

# AuditPro Enterprise™

## Datasheet

AuditPro Enterprise® is a comprehensive enterprise security assessment solution featuring critical asset identification, policy compliance, risk analysis, real time vulnerability views, enhanced reporting capability, graphical progress analysis and more. Supporting multiple operating systems and databases, AuditPro Enterprise® brings you the state-of-the-art in information systems security evaluation and risk management.

## Featured Highlights

### Complete security assessment lifecycle

With asset identification and classification exercise, you can develop your organization's IT infrastructure profile

### Logical classification of assets

Profile Manager enables you to logically classify your organization into business units each comprising of one or more assets.

### Policy creation and customization

Profile Manager enables you to logically classify your organization into business units each comprising of one or more assets with complete customization

### Report Comparison Feature

You can compare the results of individual host over a period & get the overall audit status of the systems

### Crystal Reports

Once your audit results are pushed to the database you can then use built in crystal reporting templates to generate trending, inventory & over all audit status reports.

### Vulnerability Mitigation

Effective management of the vulnerabilities discovered during the audits.

## More Highlights..

### Rediscovering your network

Visual of the main screen, not only helps you to visualize over all audit progress and view the vulnerability summary during progress but also give you detailed listing of each host

### Dynamic Updates

All the critical updates to the AuditPro Enterprise® suite are available on the [www.niiconsulting.com](http://www.niiconsulting.com). You can also download the updates manually or choose to automatically download them.

### Privileged scanning

Once your audit results are pushed to the database you can then use built in crystal reporting templates to generate trending, inventory & over all audit status reports.

### Lower false positives

The suite generated very low false positives as compared to other VA tools.

### Policy-based audits

The Policy Manager in AuditPro Enterprise® allows you to set the organization-wide parameters that you want to use for the audits

### Strong emphasis on databases

AuditPro Enterprise® has largest number of audit probes for popular database like Oracle, MS SQL & IBM DB2.

## Key product components

### Policy Manager

The Policy Manager lets you define the policies consisting of several checks that you will use to assess the assets of your organization.

### Probe Manager

Probe manager gives you the power to add new customized or user defined probes.

### Vulnerability Manager

Vulnerability Manager allows you to send reports via email to the concerned.

### Port Scanner

AuditPro Enterprise comes with a built in Port scanner for doing a port scan. AuditPro Enterprise does not use any third party tools like the infamous NMAP or similar tools for doing the port scan.

### Issue Tracking System

Issue tracking system is a web application that allows an enterprise to record and follow the progress of every problem or "issue" that a computer system user identifies until the problem is resolved.

## Technologies AuditPro Enterprise support

Microsoft Windows

•Microsoft Windows XP Professional, Microsoft Windows Server 2003, Microsoft Windows Server 2000

Linux

•Redhat, Fedora, Suse, Slackware, Ubuntu

Microsoft SQL Server

•Microsoft SQL Server 2000, Microsoft SQL Server 2005, Microsoft SQL Server 2008

Oracle

•Oracle9i, Oracle 10g

IBM DB2

•IBM DB2 v 8.0 and above

Network Devices

•Cisco Routers, Cisco Layer 3 switches

## Minimum system requirement

System Requirements	Minimum
Operating System	Microsoft Windows XP Professional, Microsoft Windows Server 2003, Microsoft Windows Server 2000, Microsoft Windows Vista.
Browser	Internet Explorer 6.0 or higher
Processor	1GHz or higher.
RAM	512MB
Disk space	250MB free disk space
Networking	Network connection to application
Back End Database	Microsoft SQL Server 2000 SP4, Microsoft SQL Server 2005, Microsoft SQL Server 2005 Express Edition, or MSDE 2000 SP4
Web server	Internet Information Server
